NURSING

Decision Package FY 2021

Department/Agency: Guam Memorial Hospital Authority Division: Nursing

Program Title: Nursing

Activity Description:

The Nursing Division consists of the Nursing Services Administration and 12 patient care departments (Emergency Room, Hemodialysis, Intensive Care Unit/Critical Care Unit (ICU/CCU), Labor & Delivery, Medical-Surgical (Med/Surg), Medical-Telemetry (Med-Tele), Nursery/Neonatal Intensive Care Unit (NICU), Obstetrics/ Gynecology (OB/Gyn), Operating Room, Pediatrics, Skilled Nursing Unit, and Surgical). The Division is responsible for the direct delivery of patient care. The following activities are specific to each department or program.

A) The Nursing Services Administration's primary role and function is to plan, administer, direct, coordinate, and evaluate the entire nursing services of the hospital. Additionally, the office provides leadership and administrative support for ALL twelve (12) patient-care nursing units with the following activities:

- 1) processing of requests for the procurement of supplies, equipment and leave requests;
- 2) formulating and processing the approval of operational, administrative and clinical policies, procedures and standards;
- 3) recruitment, retention and promotion of nursing staff;
- 4) provision and coordination of staff development and training;
- 5) coordination, analysis and implementation of the QI/PI reports/findings;
- 6) personnel support in the provision and coordination of employee health services and infection control activities in the 12 patient care nursing units;
- 7) preparation and processing of budgetary plans; and
- 8) marketing and promoting nursing as the profession/career of choice;
- 9) monitor and oversee cost of overtime hours for the department;
- 10) coordinate staffing resources for off-island transports and nurse escorts and assist in;
- 11) coordinate staffing for the delivery of quality patient care.

B) The Emergency Room is operated on a 24-hours basis on the second floor of Guam Memorial Hospital. ED delivers care to the general population of Guam. The ED provides Level II emergency services with at least one emergency certified physician and with specialty consultation available on an on-call basis. Significant subgroups of patients include patients who are mildly ill to the critically ill necessitating comprehensive emergency measures, which includes, but is not limited to trauma, cardiac, respiratory, gastrointestinal, infectious disease and orthopedics. The unit is often used as an outpatient care facility to accommodate patients without primary physicians and from clinics not in operation during the after hours. Initial assessments are done by the nursing staff and the physician on duty in the Emergency Department. Patients are referred to their respective private physicians if indicated or may be assigned to an on-call physician if they have no private physician. The ED is almost always utilized as a holding unit for admitted patients when there are no available rooms on the floors.

C) Hemodialysis Unit provides care to all patients admitted from the other facilities as well as patient that are newly diagnosed as End Stage Renal Disease. Patients with stable condition can have their treatment in the Acute Unit with staff ratio 1:2. Patient with unstable condition can receive dialysis treatment in patient room with staffing ratio of 1:1.

D) The ICU/CCU is responsible for the care of the more acutely and critically ill patients, those who are highly vulnerable, unstable, and complex, thereby requiring intense and vigilant nursing care. The ICU/CCU Unit, the unit has a bed capacity of 14. However, due to lack of skilled and competent critical care nurses, the unit can only accommodate six to eight patients over a 24 hour 24 hour staffing coverage.

E) The Labor and Delivery is governed by its mission which states that specialized care and services will be offered to expectant mothers who are 20 weeks gestation to term, who are high or low risk patients that are in the ante partum, intrapartum, and the immediate postpartum periods of pregnancy. The main concern flows with the philosophy that the unit will provide a safe environment for the mother and the baby during the ante partum, labor, and delivery, immediate postpartum and post operative stages of pregnancy. Labor room staff are dedicated to the delivery of safe, quality care in accordance with locally and nationally accepted standards. Labor and Delivery is committed to:

- 1) Maintain adequate staffing to provide quality and safe care to our patients.
- 2) Provide the necessary equipment and supplies needed to provide quality service to our patients.
- 3) Maintain knowledge and skills through ongoing continuing education, in-services, trainings, and perinatal conferences (on or off island).
- 4) Constantly evaluate and review routine techniques, procedures, and staff competency.
- 5) Attain national certification in this specialized area of nursing.

F) The Medical-Surgical (Med/Surg) unit specializes in the delivery of comprehensive medical and surgical care of adult patients. A significant group of patients include endocrine, renal, respiratory, gastrointestinal, gynecology, and oncology cases. Special procedures include chemotherapy administration. The unit is also involved with patient, family, and community education for specific diseases and works with other departments within GMHA to ensure effective patient care planning and wound care implementation.

G) The Medical-Telemetry (Med/Tele) unit serves an adult population requiring acute medical management including cardiac care, pre/post operative care, diagnostic testing, and clinical treatment. Admitting criteria include patients to be fairly stable with less complexity, who require a higher level of nursing care than found in a general patient care unit. It serves to care for patient who are stable but with a potential of becoming unstable and require increased nursing care and cardiac monitoring. The Progressive Care Unit is to monitor and care for patients with moderate or potentially severe physiologic instability. The Tele/PCU unit provides more intense level of care than a typical inpatient medical surgical unit, but a less intense level of care than the Intensive Care of Unit. These patients require intermediate nursing vigilance. Progressive care is considered to be at the less acute end of the critical care continuum. Patients in progressive care are moderately stable or stable with a high potential of becoming unstable. The patient to nurse ratio is 1:4 to follow safe standards of practice. As the intensive care unit is currently limited to only 8 beds, Tele-PCU often absorbs the over flow ICU patients in the unit. Tele/PCU manages an average of 2 ICU level of care patients every week. There's an average of 8 patients waiting for Tele/PCU rooms at ER annex on daily basis. Patients from ER are downgraded from ICU to Tele or PCU level, so they can be placed in a room. When patients from Surgical and Med-Surg become unstable, they are often placed in Tele/PCU as ICU level due to staffing issues in ICU. Tele staff also frequently escort patients for outside diagnostic studies and escorting patients for off island transfers.

H) The Nursery/NICU provide three levels of care for newborn patients:

1) Regular Nursery- care for normal newborn babies, such as feeding and routine newborn care.

2) Intermediate Care Nursery- newborn babies with feeding problems, rule out sepsis that needs antibiotic therapy, infants that need supplemental oxygen and IV therapy, infants with congenital abnormalities that do not need ventilator or less intensive monitoring, and premature/term infants from step down NICU care.

3) Neonatal Intensive Care Unit- extremely low birth weight and term infants needing constant care, ventilator support, and parental therapy. Newborns with multisystem abnormalities such as cardiac, neuro, gastrointestinal and other congenital abnormalities that requires extensive monitoring and management.

I) The Operating Room provides quality care and continuity of care to all patients during the pre-operative, intra-operative, and post-operative phases of the surgical experience.

J) The Obstetrics/Gynecology Unit, also known as the Mother and Baby Unit, provides direct patient care for both antepartum (pregnancy related problems, except laboring patient and needing continuous monitoring), post partum patients, and may also be used for OB/GYN related patients, and newborn babies. Post partum care encompasses management of the mother and newborn during the post natal period.

K) The Pediatric unit provides care to patients from newborn to sixteen years of age who are acutely or critically ill; provides education to patients, parents, family and support person; and gives guidelines and instructions prior to the patient's discharge. Staff also accompanies patient at in and off campus procedures and at off-island facilities.

L) The Skilled Nursing Facility (SNF) is primarily engaged in providing Skilled Nursing Care and related services to residents who require medical or nursing care. It also provides rehabilitation and recreational services for the rehabilitation of injured, disabled and for the rehabilitation of injured, disabled and sick persons.

M) The Surgical Unit's main priority is to provide care to post-operative patients as well as preparing them for surgical procedures such as orthopedics, gastrointestinal, neuro, genitourinary, podiatry, etc. The patients are admitted as observation status and regular admission. The unit staff also provides care for patients that have been downgraded to a regular and stable status such as medical-telemetry/PCU, ICU/CCU, hemodialysis patients, as well as OB patients (post delivery) when there are no rooms available in OB unit. The unit provides care to patients who are admitted less than 24 hours for chemotherapy and blood transfusions.

N) There is also a Rapid Response Team (RRT), which is comprised of expert trained medical and nursing professionals from ICU/CCU and different adult nursing units and the Respiratory Department working together to provide effective communication with the primary physician on the patient status and work collaboratively with the nurse clinician to improve early recognition and response to changes in patient's condition. The goal is the reduction of code 72 events with early intervention. The Rapid Response Team (RRT) is operational on a 24-hour basis in all acute adult units outside of ICU/CCU and the Emergency Department. The acute adult units that the RRT services consists of the Telemetry/Progressive Care unit, Medical Surgical Unit, Surgical Unit, OB Ward, Labor and Delivery, Acute Hemodialysis Unit and the Radiology Department.

Major Objective(s):

1) Improve cash flow by addressing the following seven (7) distinct issues and improving organization-wide services and systems delivered and managed by properly led and staffed departments: (1) generating and maximizing revenues; (2) continuing effort to obtain underpayment reimbursement of Medicare Services through Annual Adjustment and Permanent Rebased requests with the Centers for Medicare and Medicaid Services (CMS); (3) updating of fee schedules and collection of charges for services provided; (4) assisting uninsured patients in obtaining coverage through Medicaid or Medically Indigent Programs; (5) working with the Government of Guam to identify dedicated funding sources for its operational shortfalls and capital improvement requirements; (6) changing the "care model" from primarily "inpatient hospital-based" to "outpatient hospital-based;" and (7) providing resources and ongoing training to Fiscal Services (accounting, patient affairs, patient registration, and medical records) to keep up with constantly changing rules and regulations with the healthcare industry.

2) To develop a Leadership Team capable of properly leading, managing, and holding accountable the staff that comprise GMHA's divisions/departments.

3) To effectively establish and sustain GMHA's safety and quality culture.

4) To effectively assess, develop, and implement GMHA's Training & Education Plan.

5) To effectively develop and implement GMHA's Capital Improvement Plan to include modernization of its Facilities and replacement of obsolete Capital Infrastructure, which includes, but is not limited to, Clinical and Non-Clinical Space Design & Construction/Renovation Projects, Utility Systems, Medical Equipment and Information Technology (IT).

The Nursing Division also has the following Sub-Objectives:

- 1) To provide optimal and safe quality care to all patients and residents.
- 2) To serve as a setting for continuing education of medical, nursing, and para medical personnel within GMHA and the community.

 - The Recruitment Plan will center on identifying the real recruitment needs of the Nursing Division and tying it to the overall Strategic Plan. The Nursing Division needs range and vary from the immediate to medium and long term needs.
 - Recruitment of nursing professionals involves utilization of several methods to accomplish the goal to include, but not limited to: (a) Local Advertisements; (b) National Advertisements; (c) Travel Companies; (d) Collaborating with Guam's local Colleges (e.g., GCC) and Universities (e.g., UOG); (e) Healthcare Industry-Focused and General Job Fairs; (f) Foreign Recruitment; and (g) Other Government Agencies to include the Department of Labor and the Professional and International Programs.
- 2) Provide safe quality patient care on a 24-hour basis.
